4428 176th St SW #2 • Lynnwood, WA 98037
(425) 471-3894 • Megan@DefinedByEye.com

OBJECTIVES

I have a solid understanding of what it takes to create a website due to my work in the roles of project manager, designer and developer. Now I would like to focus on websites after creation, and learning the ways of social networking and search engine optimization.

WORK EXPERIENCE

December 2007 – Current **Defined By Eye, LLC** Lynnwood, WA
Owner

I created Defined By Eye LLC in December of 2007 when my employer, NetRiver, Inc, elected to discontinue web development in order to concentrate on their new Lynnwood data facility. This opportunity allowed me to strengthen my design and development skills, as well as provide local web development services to

May 2005 – May 2008 **NetRiver, Incorporated** Lynnwood, WA
Project Manager and Web Developer

Working with NetRiver, Inc allowed me to gain a wide variety of experience in team work, tasks, and projects. I worked in teams with one to three developers who were sometimes in-house, overseas, or locally contracted. I worked both on my own and with a senior project manager. Towards the end of my position, I took on some of our development tasks. My duties are listed below:

<u>Project Management</u>	<u>Web Development</u>
<ul style="list-style-type: none">• Requirement collection and analysis• Project scope/bid creation• Scheduling• Content collection and analysis• Copywriting• Business flow analysis• Quality Analysis• Testing• Web site maintenance management• Misc. development support management	<ul style="list-style-type: none">• Front and back end development (PHP/MySQL, HTML/CSS)• Site design• User interface design• Search Engine Optimization (SEO)• Newsletters• Streaming video• Installation and configuration of:<ul style="list-style-type: none">○ Shopping carts○ Photo galleries○ Forums○ Content Management Systems (CMS)

Project size and scope varied as well. Below are several examples of our projects:

- *Small projects* - Static sites are usually small and several can be in progress at the same time. Examples: [Kenis Loven](#) and [Design Real Estate](#). We implement Joomla on those that need a content management system. Example site with streaming video module: [Edmonds Public Education Foundation](#)
- *Medium projects* – Medium projects at NetRiver usually have a custom component, such as ecommerce-enabled custom forms. Example: [Concorso Italiano](#)

- *Large projects* – Our larger projects tend to be community-oriented sites that require custom content management systems and ongoing maintenance and enhancements. Examples: [Hillel UW](#), [South Snohomish Chamber](#), [The Breakfast Group](#)

EDUCATION

2001 – 2005 **Washington State University** Pullman, WA
Bachelor of Science in Computer Science, Minor in Fine Arts
GPA: 3.2, Honors College Graduate

1997 – 2001 **Moses Lake High School** Moses Lake, WA
Diploma
GPA: 3.965

INTERESTS AND ACTIVITIES

Computer people are generally viewed as geeks, and I am no exception. I enjoy games on all platforms (PC, Xbox, Playstation, Wii etc) as well as the occasional table top role-playing game. I love finding new music via Itunes and streaming radio... [KGRL.FM's](#) stream and website are both worth the visit. Another pastime is to put my Fine Arts degree to use, usually with the aid of my Wacom tablet and Adobe CS3. When I'm not doing any of the above, I curl up with my two cats and a good book.
